Work Experience

IT Assistant | Legends 06/2018-11/2018

- Quickly repaired and troubleshoot offline iPad based cash registers during concert to help sales continue to continue sales at multiple different stands.
- Helped set-up wireless network to increase the radius of the wireless connection accommodate multiple new concessions stands at a concert venue.

Courtyard Supervisor | Legends 06/2019

- Organized and maintained 12 beverage stands in a courtyard for a large concert venue.
- Managed transfer of product between stands to increase sales efficiency.

Development Portfolio

Journey 03/2020

<http://ec2-52-14-111-28.us-east-2.compute.amazonaws.com/>
<https://github.com/plaetzaw/FitnessTracker>

- Journey is a fun exercise tracker that helps you count your calories in order to track your expected weight loss. This project focused mainly on back-end development in which I worked a lot on sequelize.

Level++ 02/2020

<https://dc-project-1-39cab.firebaseio.com/> | <https://github.com/matthewtryan99/project-1>

- Level++ is a website, worked on by 3 other people and me, that allows users either paired or solo to practice different web development problems as a learning tool.

Python RPG 01/2020

<https://github.com/matthewtryan99/hero-rpg>

- Python RPG is a terminal game created using python. This project showcases loops and conditional statements and an understanding of object-oriented programming.
